

INFORMATIONAL BROCHURE

DHL DUTY & TAX CALCULATOR

Did you know that 70% of end consumers want to see all delivery costs up-front and pay taxes at the point of purchase rather than upon arrival?¹⁾ The DHL Duty & Tax Calculator helps your business convert its online store into a successful cross-border selling channel. It gives end consumers visibility on total transaction costs at checkout, and you better control over profitability.

1) eMarketer/Statistica | Common Sense Advisory | Future Pay; IPC 2017 | Penton Research and E4X

About

DHL's carrier-agnostic Duty and Tax Calculator (DTC) allows all types of merchants to calculate the duties, taxes, and government fees based on the end consumer's shopping cart. The cross-border transaction fees are added to any shipping options and displayed as one simple all-inclusive shipping cost to the end consumer.

On top of a transparent checkout for end consumers, DTC allows merchants to choose the strategy for pricing, offering an opportunity to have better control over profitability.

100% Visibility

Eliminate unexpected charges at delivery by showing the actual total cost of an order

Downloadable

Integrating the tool into your checkout is simple and can be done via the DPDHL Developer Portal or Shopify

Carrier Agnostic

Can be used with any shipping carrier or shipping strategy

Fully Customizable

Customizable according to your unique business needs

Start improving your checkout conversion

The Duty and Tax Calculator is available for self-onboarding on the DPDHL Group Developer Portal and Shopify's app store - see what our first customers have to say:

Buddy Lee Jump Ropes

Location United States

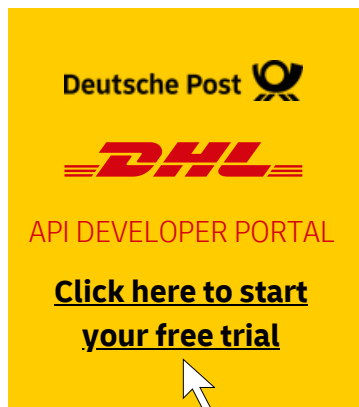

This app has helped take the guess work out of the tax and duty calculations when shipping to Europe. With prepaid taxes and duties customers will not be hit by surprise charges at delivery.

Pete & Pedro

Location United States

The DHL Duty and Tax calculator is an amazing, easy to use app. The way the app is setup with the Shopify environment makes it extremely easy to add and remove countries as needed and make sure the appropriate Taxes and Duties are applied to each order at checkout. The development team are very responsive and helpful as well and have always gone out of their way to help get things set up and adjusted as needed. If you need an app to help take care of taxes and duties, look no further than this app.

Direct integration offers you to...

1. Fully customize your own experience
2. Seamlessly integrate real-time quoting
3. Provide clear details on landed cost during workflow

To get started, simply...

1. Download the app
2. Configure your shipping zones and pricing strategy
3. Enable your shipping zones
