

INTERNATIONAL INBOUND FOR BATTERIES

Specialist personnel, services, and facilities to meet the legal and practical demands of moving electric vehicle batteries

Classified as dangerous goods, electric vehicle batteries must be transported with care, requiring complex logistics and strict legal compliance. Wherever they are handled and transported to manufacturing plants, specialized expertise is essential.

TYPICAL BUSINESS CHALLENGES

- Providing compliant solutions
- Meeting regulations
- Securing capacity
- Handling safely
- Delivering on time

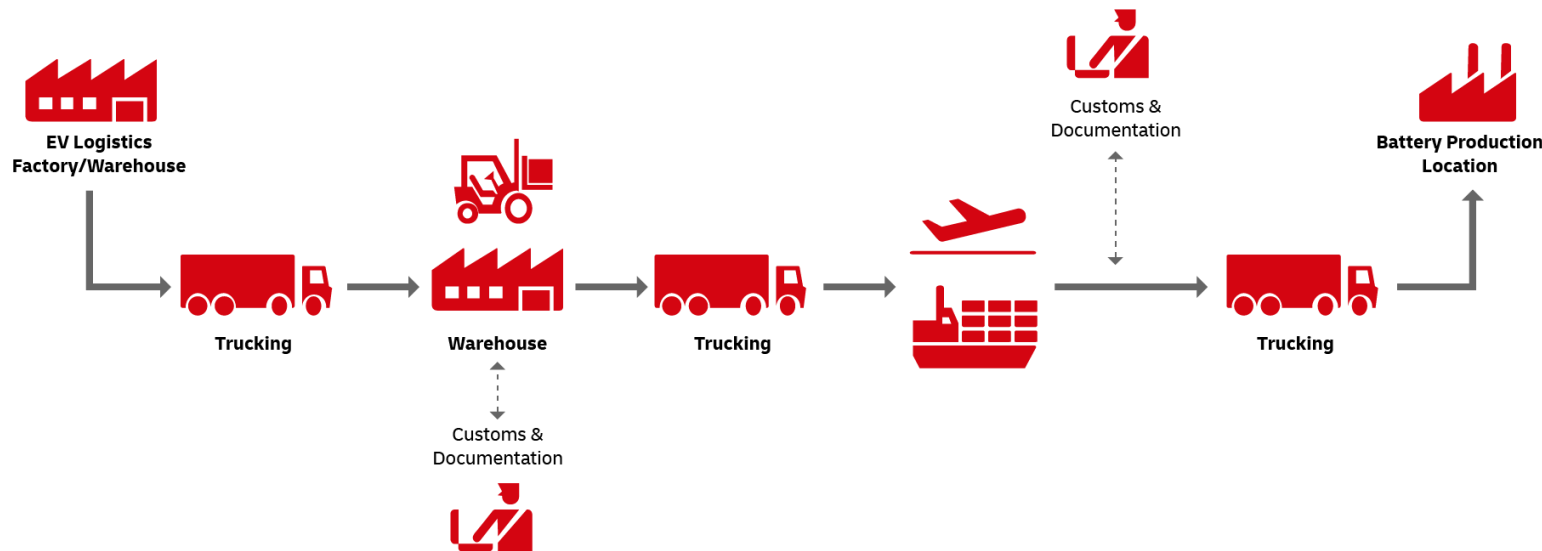

DHL SOLUTION

This solution ensures regulatory compliance across all transportation legs including pre- and on-carriage, air and ocean freight. Reliable, on-time delivery is assured with fully trained and experienced staff, certified procedures, and access to dangerous goods freight capacity.

SOLVING YOUR BUSINESS CHALLENGES

- ✓ **Providing compliant solutions** – Best practice combined with global capabilities and extensive experience; compliant, standardized yet customized modular solutions
- ✓ **Meeting regulations** - Including locally and internationally compliant documentation, essential documentation audits, approved packaging, and approvals for the entire logistics process
- ✓ **Securing capacity** - Established partnerships ensure DHL secures air and ocean capacity in highly competitive markets
- ✓ **Handling safely** - With qualified, experienced personnel, meeting all relevant regulatory levels and specialized customer requirements; for example, purpose-designed, well-ventilated reefer containers for ocean freight
- ✓ **Delivering on time** - Reliably meeting lean inventory demands and tight electric vehicle production schedules

COMPLEX LOGISTICS NEEDS & LEGAL DEMANDS: MOVING EV BATTERIES GLOBALLY
