

AFTERMARKET LOGISTICS FOR MINING DEALERS

Keeping mining equipment up and running with the efficient delivery to dealers of spare parts and consumables

Mining dealers rely on daily deliveries of spare parts and consumables to keep mining equipment up and running. Typically, these items are shipped to the mining site from a strategically located distribution center.

TYPICAL BUSINESS CHALLENGES

- Effectively managing all bulk & loose items
- Ensuring on-time, in-full (OTIF) delivery
- Replenishing stock on an as-needed basis
- Optimizing network routing & transportation frequency
- Designing efficient milkruns

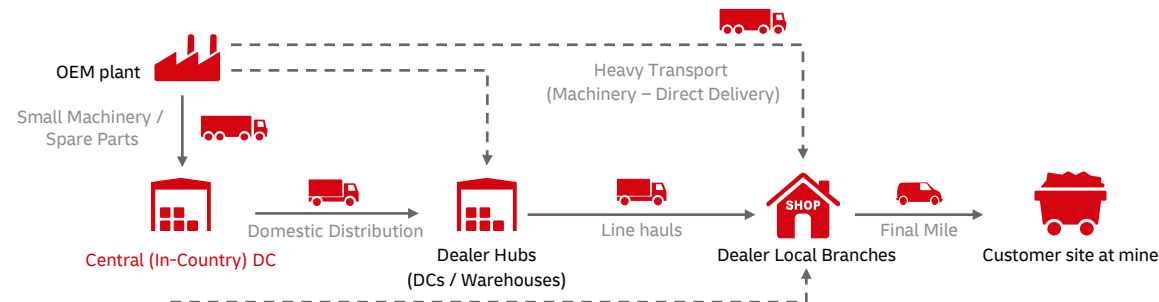

DHL SOLUTION

This solution meets the specific needs of mining dealers, enabling their provision of spare parts and consumables for mining equipment operating at rural, often remote mining sites. It delivers aftermarket services that simplify inventory management and improve transportation.

SOLVING YOUR BUSINESS CHALLENGES

- ✓ **Effectively managing all bulk & loose items** – Single IT platform gives order and shipment visibility, including brand identification and pick-and-pack operations; instant data access ; robust warehouse processes
- ✓ **Ensuring on-time, in-full (OTIF) delivery** – Correct spare parts and consumables delivered according to schedule
- ✓ **Replenishing stock on an as-needed basis** – Enable daily or weekly linehauls to ensure timely replacement of inventory; choice of transportation modes
- ✓ **Optimizing network routing & transportation frequency** – Excellent network coverage; dealers within the same geographical area can share local transportation services
- ✓ **Designing efficient milkruns** – Cost savings and service improvements for regular deliveries
