

INDUSTRIAL PROJECTS – OUT OF GAUGE / PROJECT CARGO

For the safe, compliant movement of over-sized cargo with specialized handling requirements

Engineering, manufacturing, and energy companies require specialized services to transport out-of-gauge cargo (also known as heavy-lift or project cargo). This may be for plant relocation or to reposition important equipment.

TYPICAL BUSINESS CHALLENGES

- Achieving full HSSE & business ethics compliance
- Tracking purchase orders & material changes
- Actively monitoring for end-to-end visibility
- Planning to the finest level of detail
- Minimizing contact points for all operations

DHL SOLUTION

This solution brings a vast range of experience and expertise under one roof: detailed scoping, design, planning, management, and operations. Working closely with equipment suppliers, DHL enables the safe and compliant transportation of over-sized cargo.

SOLVING YOUR BUSINESS CHALLENGES

- ✓ **Achieving full HSSE & business ethics compliance** – Strong HSSE culture (zero incident); dedicated compliance officer; rigorous vetting process; zero tolerance policy
- ✓ **Tracking purchase orders & material changes** – Single IT platform; standardized processes; maintain project schedule and manage project cost within budget
- ✓ **Actively monitoring for end-to-end visibility** – Control tower overview of all supply chain activities to meticulously track each cargo movement and avoid damage
- ✓ **Planning to the finest level of detail** – In-house technical team for logistics planning; route surveys including bridge limitations; rehabilitation studies; feasibility studies; technical support documentation; technical cargo drawing
- ✓ **Minimizing contact points for all operations** – Single point of contact from collection at origin to scheduled delivery at destination; improves time to serve
