

LEAD LOGISTICS PARTNER (LLP)

Coordinating, planning, and scheduling goods transportation while managing logistics processes and multiple stakeholders

Engineering and manufacturing organizations must proactively manage the movement of goods by air, ocean, road, and rail. They must track each shipment while also monitoring multiple suppliers, carriers and logistics providers and find ways to reduce costs

TYPICAL BUSINESS CHALLENGES

- Achieving visibility & management control
- Ensuring supply chain visibility
- Lowering overall logistics costs
- Improving on-time delivery
- Managing all parties; tracking performance

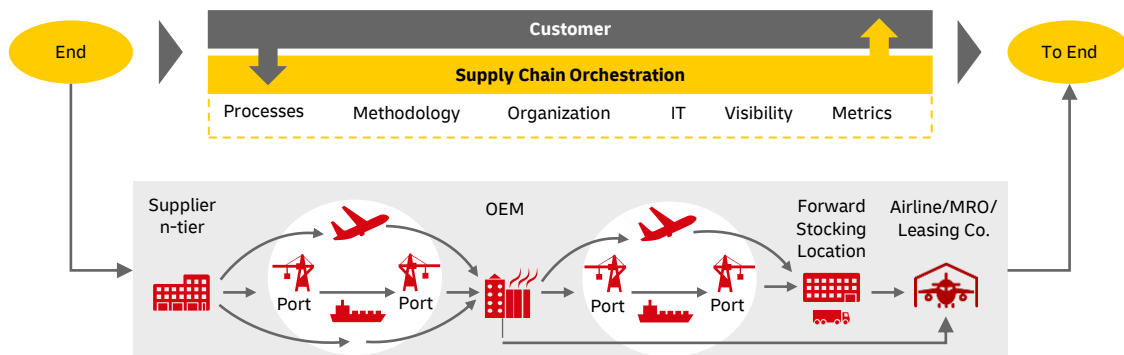

DHL SOLUTION

As the lead logistics partner (LLP), DHL delivers end-to-end, integrated supply chain management for multiple stakeholders via a global or regional control tower. Decision making is centralized and standardized across every location, with shipment visibility data available in near real time.

SOLVING YOUR BUSINESS CHALLENGES

- ✓ **Achieving visibility & management control** – Logistics control tower enables high-quality end-to-end execution for inbound, manufacturing, distribution, and delivery; control at global, regional, country, and site level
- ✓ **Ensuring supply chain visibility** – Real-time transparency of multimodal finished goods and spare parts shipments
- ✓ **Lowering overall logistics costs** – Holistic perspective; logistics value chain enhancements; process standardization; network optimization; multiple cost efficiencies in transportation, warehousing, value-added services, and inventory management
- ✓ **Improving on-time delivery** – Proactive shipment management to meet schedules and achieve continuous improvement
- ✓ **Managing all parties; tracking performance** – Stakeholder rationalization; supplier scheduling and fulfillment; coordinating and controlling logistics service providers and carriers; identifying and assessing key performance indicators (KPIs); accurate reporting, forecasting, and analytics

MANAGING TRANSPORTATION, LOGISTICS PROCESSES, AND MULTIPLE STAKEHOLDERS

LEAD LOGISTICS PARTNER

KEY BENEFITS FOR YOUR BUSINESS

CENTRALIZED

Single global IT platform and agile global network infrastructure

PEACE OF MIND

One flexible partner (LLP) with highest standards of logistics expertise

COST

Savings aligned with the logistics/transportation program and initiatives

STABILITY

Centralized operations enable demand and forecast stability

OPTIMIZED

Integrated 3PL network through re-engineered transportation optimization
