

CUSTOMS MANAGEMENT CONTROL TOWER

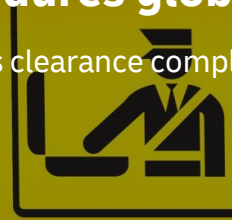

WE CARE

Combining country-specific expertise with global capabilities to manage and optimize all customs clearance procedures globally

Company's time sensitive supply chains require a fast and consistent customs clearance compliant with all local regulations.

Customs

TYPICAL BUSINESS CHALLENGES

- Transparency over all customs clearance processes
- Complying with local regulations
- Minimizing import & export exceptions
- Ensuring rapid customs clearance
- Taking advantage of special trade preference programs
- Reducing overall costs

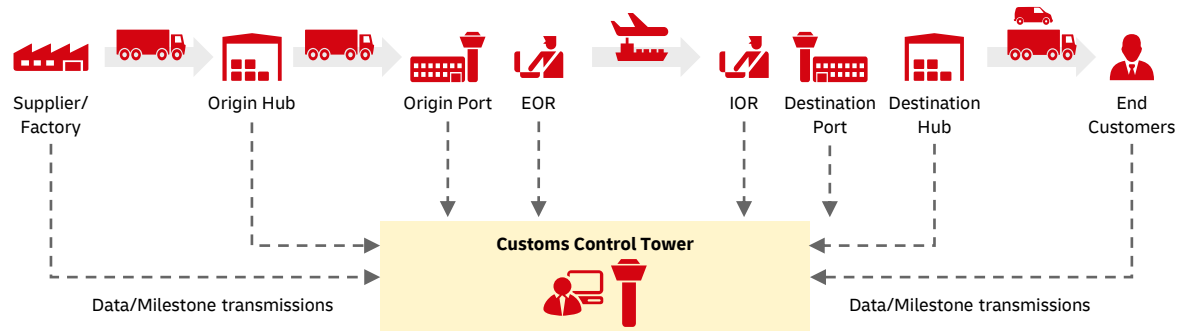

DHL SOLUTION

A Customs Control Tower solution enables coordination and control of international customs clearance activities. Each Control Tower is tailor made to our customer's unique needs but may include activities such as: upstream compliance management, Import/Export license management, HS classification, maintenance of master lists and import bookkeeping, and more.

SOLVING YOUR BUSINESS CHALLENGES

- ✓ **Overseeing all customs clearance processes** – One global logistics partner with expertise and experience; single point of contact; transparent management of all customs brokers
- ✓ **Ensuring rapid customs clearance** – Smooth, optimized customs clearance improves demand planning, reduces delivery lead times, optimizes logistics networks, and can reduce inventories.
- ✓ **Complying with local regulations** – Governance and assurance of compliance with trade law and customs procedures in each country
- ✓ **Increasing visibility** – Transparency on what has been declared on your behalf helps ensure against hidden compliance risks.
- ✓ **Minimizing import & export exceptions** – Manage and reduce the risk of inspections, shipment delays, and other customs entry and exit exceptions
- ✓ **Reducing overall costs** – Effective customs management in each country of operation lowers overall supply chain costs
