

INFRASTRUCTURE INSTALLATION & DEPLOYMENT SERVICES

Coordinating, planning, and scheduling key network infrastructure services to speed up turnaround times and reduce costs

Network infrastructure equipment companies must meet very high aftermarket service demands. Telco partners expect parts delivery and installation across huge geographies, involving multiple logistics providers, carriers, engineers, and installers.

TYPICAL BUSINESS CHALLENGES

- Controlling & managing multiple parties
- Avoiding miscoordinations
- Achieving forward inventory positioning and visibility
- Identifying time- and cost-saving opportunities
- Reducing dependency on third-party service vendors
- Meeting standards & driving improvement

DHL

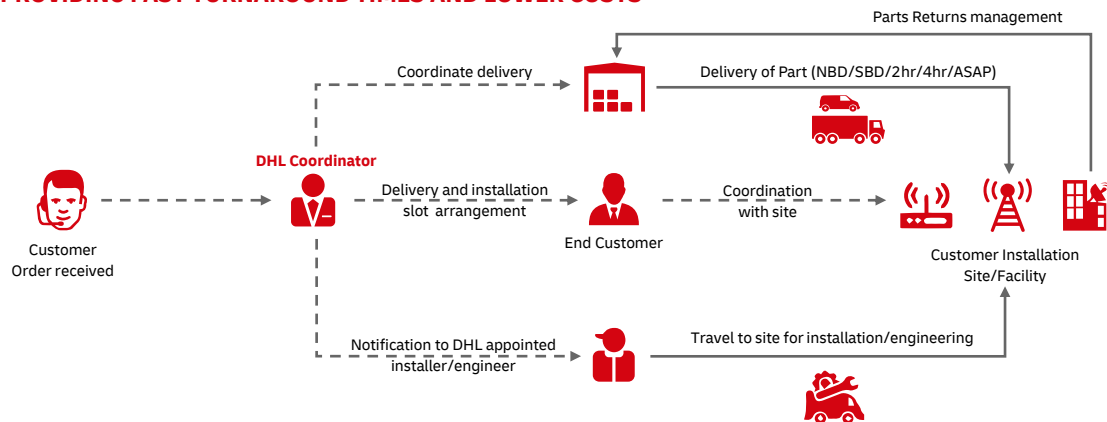

DHL SOLUTION

With this solution, DHL provides network infrastructure equipment companies with integrated project management and the coordination of installation and deployment services. Decision making is centralized and standardized to ensure installation efficiency and deployment transparency.

SOLVING YOUR BUSINESS CHALLENGES

- ✓ **Controlling & managing multiple parties** – Coordinating all logistics service providers, carriers, engineers, and installers
- ✓ **Identifying time- and cost-saving opportunities** – Holistic perspective; reduce warehouse-to-installer touchpoints; cut transportation costs; boost turnaround times
- ✓ **Avoiding miscoordinations** – No time is wasted as various parties don't have to wait for parts or personnel to arrive at the agree time and place
- ✓ **Reducing dependency on third-party service vendors** – Project management and direct coordination with stakeholders enables more efficient use of logistics resources.
- ✓ **Achieving forward inventory positioning and visibility** – Stock positioning is optimized; deployment transparency
- ✓ **Meeting standards & driving improvement** – Best-in-class project management and coordination; health and safety-compliant on-site engineering and installation services; quality control
