

SECURED TRANSPORTATION

For the safe and secure movement of high-value goods, managing risks and delivering on agreed standards

Financially or strategically valuable goods must be monitored, handled, and transported with additional care, particularly in areas of political or social unrest and where the transportation infrastructure is disrupted. .

TYPICAL BUSINESS CHALLENGES

- Ensuring extra security
- Protecting against theft, damage & loss
- Proactively monitoring each shipment
- Managing risks
- Complying with standard operating procedures

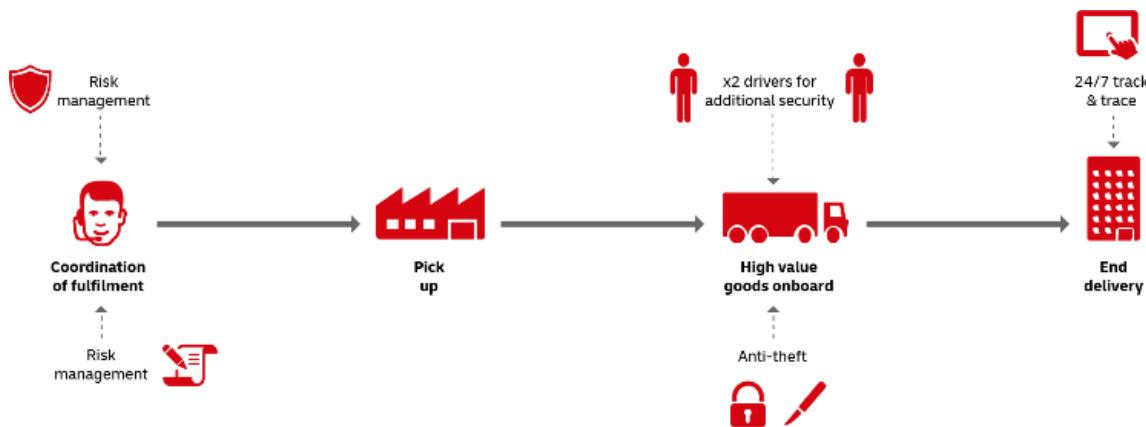

DHL SOLUTION

DHL goes the extra mile to keep shipments secure, whatever the threats. This solution provides extra end-to-end protection through the combination of secure equipment, technology, and practices including 24/7 real-time monitoring, visibility, and communication. Nothing is left to chance

SOLVING YOUR BUSINESS CHALLENGES

- ✓ **Ensuring extra security** – From pick up to proof of delivery
- ✓ **Protecting against theft, damage & loss** – Using secure vehicles, parking facilities, and practices
- ✓ **Actively monitoring each shipment** – With real-time visibility and 24/7 driver contact
- ✓ **Managing risks** – Through constant surveillance, assessment, mitigation measures, and fast response to emerging threats
- ✓ **Complying with standard operating procedures** – Establishes clear accountability and meets insurance requirements

ACTIVELY MITIGATING THREATS WITH DHL'S END-TO-END SECURE TRANSPORTATION

SECURED TRANSPORTATION

KEY BENEFITS FOR YOUR BUSINESS
