

LEAD LOGISTICS PROVIDER

Coordinating, planning, and scheduling goods transportation while managing logistics processes and multiple stakeholders. Putting you in control of optimization and visibility

Data analytics, coordinated via our LLP control towers, give you visibility of your end-to-end supply chain, enabling proactive optimization and management.

WHAT WE DELIVER – LLP VALUE

Through our LLP solution we deliver...

Business transformation support

Strategic expertise to support you with achieving your objectives, e.g. sustainability, entry into new markets, M&A activity, scalability etc.

A safe and compliant solution

All solutions are built with safety and compliance at the heart of all activity, both internally and externally on behalf of our customers

Service excellence across the Supply Chain

Enabling baselining, program improvement plans and continuous improvement to drive service excellence across all aspects of the Supply Chain i.e., optimization, inventory levels, procurement

A centralized and standardized approach

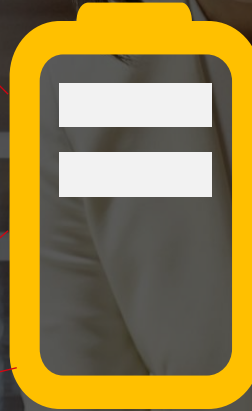

Driving improved service levels and resilience across the Supply Chain by ensuring sector, business unit or regional alignment in instances where there are silos

Total logistics cost management and efficiencies

By enacting our core pillars, we are able to not only report on our customer total logistics costs, but through tangible service improvements realize sustainable cost savings over the life of the contract

Full Supply Chain visibility

Utilizing DHL's industry leading IT platforms to enhance our customers' Supply Chain agility and visibility from point of manufacture, supply to the point of delivery

Multi-modal electric vehicle batteries logistics

End-to-End Europe-Americas Battery Solution for a major OEM's new EV assembly line

CUSTOMER CHALLENGES

- **Situation**
New EV model launch requires fast transition to customer's assembly line
- **Requirements**
Safe, compliant lithium-ion battery supply chain
- **Customer's logistics strategy**
3PL End-to-End Battery transport solution (Europe - Americas) with centralized single-point inventory and potential cost savings on import duties.

DHL SOLUTION

- **Proprietary Solution**
Quick, low-cost integration based on 20-year partnership, connected **Control Tower**, and customer specific developed wholistic logistics program.
- **Requirement fulfilled**
Safe, compliant solution using **reefer containers** from Europe to the Americas, with industry leading **temperature and humidity control** IoT tech

Solution includes **temporary import duty suspension** services for cost benefit and to manage import complexity.

CUSTOMER BENEFITS

- **Consistency and excellence** in compliant operational performance to maintain production standards
- **One single point of contact** for inbound logistics enhancing accuracy in part management
- **Integration, translation & connectivity** between customer sourcing plans into specific requirements of parts from suppliers
- **Warehouse near assembly line** for lean JIT process
