

YOUR PRIORITY LANE FOR ROAD FREIGHT

MORE SUSTAINABLE BY DEFAULT

The premium LTL service connects Europe's most important economic regions every day within 24 or 48 hours. In addition to offering the highest levels of reliability and priority, we are committed to compensating a certain percentage of the carbon emissions associated with your shipments.

Interactive Brochure

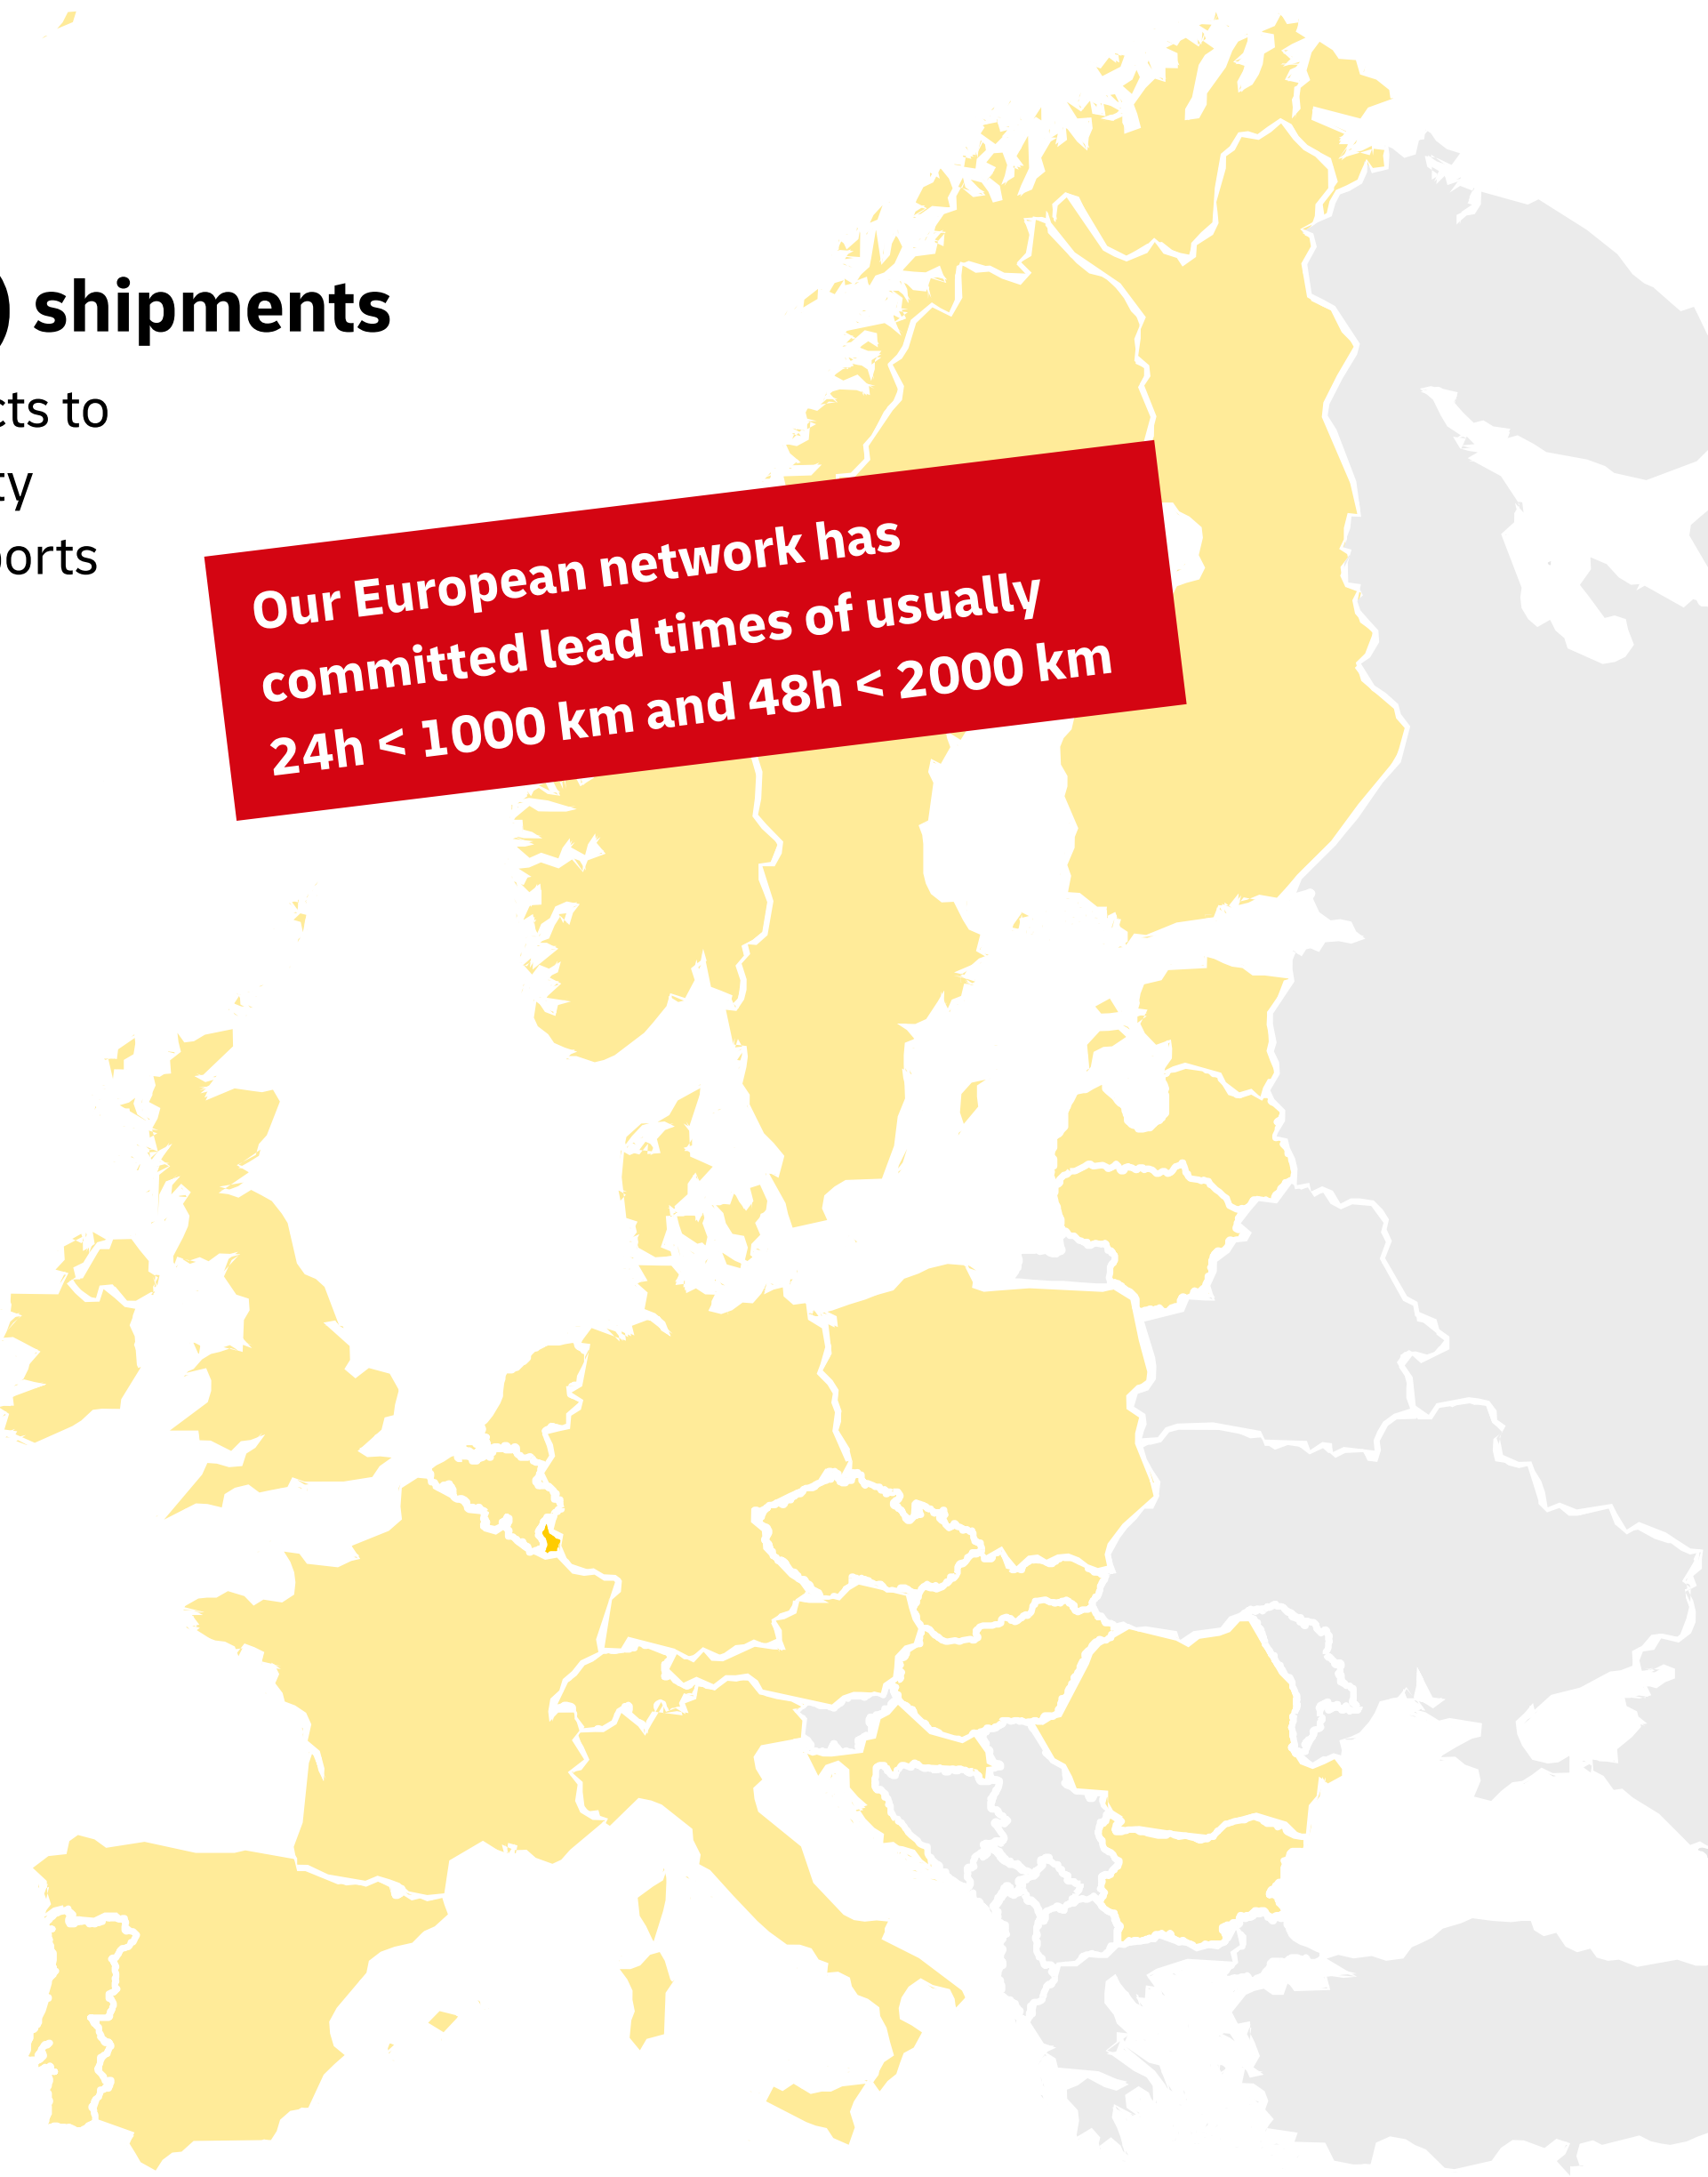

DHL FREIGHT EURAPID

For your time-critical and high-priority groupage and less-than-truckload (LTL) shipments

As sustainability gains greater significance in the logistics industry, it is our duty to evolve and innovate our products to meet these essential expectations. With DHL Freight Eurapid, we now offer a more sustainable, day-definite priority groupage network product that reduces carbon emissions by ~10% through insetting. This additional service supports your sustainability roadmap, and you'll receive an annual certificate showing your reduced carbon emissions.

Our European network has committed lead times of usually 24h < 1000 km and 48h < 2000 km
